**Internal Quality Assessment (IQA) Report**  
**Ching Chueh Buddhist Sangha University, Taiwan**  
**Executive Summary**  
**MCU Affiliated CCBSU Quality Assurance Committee**  
**4 July 2017**

-----

**Ching Chueh Buddhist Sangha University Performance in 2016**

The mission of Ching Chueh Buddhist Sangha University is to produce good quality Sangha graduates with right view and understanding to contribute to the development of Buddhism. Therefore, CCBSU strives to meet this need through the recruitment of monastic.

CCBSU offers full scholarships, boarding and lodgings to students during their learning at the university. It provides classrooms, computer room, meditation room, accommodation and related facilities conducive to their learning outcome.

In academic year 2016, CCBSU put a lot of effort to raise the quality of its regulatory standards, graduates, students, instructors, curriculum, learning and teaching, and learning resources. The self-assessment was done under 14 key performance indicators put forward by the Office of the Higher Education Commission (OHEC), Thailand.

The results of internal quality assessment for all two programs (B.A. and M.A. in Buddhist Studies) passed the standard control criteria specified in component 1 which is beneficial in maintaining academic and professional standards as one part of accreditation criteria. It demonstrates that CCBSU achieves “Satisfactory” quality level.

### **Overall Strengths**

1. CCBSU offers full scholarships, boarding and lodgings to students during their learning at the university.
2. CCBSU manages teaching and learning process integrated with temple social welfare activities for the sake of student development.
3. CCBSU graduates have devoted themselves as leading Buddhist leaders for promotion of Buddhadhamma in Taiwan and their own countries.

### **Overall Suggestions and Recommendations for the improvement**

1. University should develop measures to stimulate regular instructors to produce research works and books so that it will reflect the quality of teaching and learning process.
2. There is still no concrete instructors and staff development plan. It should be made and implemented.
3. CCBSU should find out ways and means such as advertisement through various channels, set up Buddhist networks in Taiwan and abroad etc., to increase a number of students.
4. CCBSU should make a plan to train existing students to be excellent in Buddhist academic field and social welfare including skills of English usage and communication, focussing on quality rather than quantity.
